

# Watch out when buying ladders!

## Storage tray

Practical and robust storage tray made of high-strength plastic.

## Rail

Large-format, closed, rectangular uprights made of strong aluminium profiles.

## 'safe-cap'

Ladder joint with larger contact surface, 3-fold riveting and higher wall thickness for even more stability and longevity of the ladder.

## Made in Germany

Our products were the first to be certified with the TÜV Nord seal of quality „Made in Germany“.

## Spreader lock

High level of stability due to spread protection with 2 high-strength perlon belts (for single-sided stepladders from the 7th step onwards).

## 15 years warranty

DIN EN ISO 9001:2008 certified and with a 15-year quality guarantee. Almost all our products are type or GS tested.

## Flanging

4-fold flanged rung spar connection, durable and safe.

## ergo-pad®

Grip zone for ergonomic comfort. With handle lock.

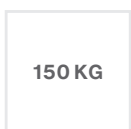

## Steps

80 mm deep, ribbed steps with durable step rail connection.

## nivello®-ladder shoe

Patented joint with intelligent 2-axis tilt technology for full-surface support on the ground, angle of attack control and interchangeable foot plates.

## Load

Our ladders are designed for 150 kg load.

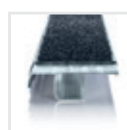

## Alternative equipment for stepladders

## relax step® Step padding

Comfortable step padding made of high-quality rubber for pleasant and safe standing.

## clip-step und clip-step R13 Step pad

Step pads with extra high slip resistance for optimised slip resistance on our steps. NEW: Certified step pads clip-step R13 for R13 work areas. Also available as a retrofit kit.

## Spring rollers

Easy self-assembly of four spring-loaded swivel castors, for easy movement of the ladder when unloaded.
