ML FlexxLift 4.0 MP Ex

Specification

Working height 2.13 - 4 m	Platform height 0.13 - 2 m	Platform length 0.74 m	Platform width 645 mm	Base area length 1.18 m
Base area width 735 mm	Approved for outdoor use No	Max. load capacity 135 kg	Transport dimensions (plus packaging) 1180 x 735 x 1670 mm, 275 kg	Business division MUNK Günzburger Steigtechnik
Order no. 127128				

Facts

- Vertical mast lift with a working height of 4.00 m
- Explosion-proof design (EX)
- Manual travel and lifting drive
- Patented gas spring lifting mechanism, which operates without power and can be operated with one hand
- Agile and easy to manoeuvre

Description

In potentially explosive atmospheres, every detail counts. The ML FlexxLift 4.0 MP (EX) manual vertical mast lift is explosion-proof and raises you to a working height of 4.00 m – without electricity and in complete safety.

Explosion-proof and battery-free

The EX version is designed for work in potentially explosive atmospheres. The patented gas spring mechanism supports the load whilst you raise and

- Fits through standard doorways and is suitable for lifts thanks to its compact transport dimensions
- Suitable even for extremely delicate floors thanks to its very low weight
- Open work basket with horizontal knee rail
- Handy storage for tools etc.
- Maximum load capacity: 135 kg (1 person + equipment)
- Forklift pockets and lifting eyes
- Tested in accordance with DIN EN 280-1 (Class 1A)

lower it with one hand. You don’t need a battery or a power connection – simply roll the platform to the work site and get started.

Open basket – loaded from the side, without having to reach round

In the open basket, you can load and unload your materials comfortably from the side, rather than having to lift them over a high edge. This means you can access items at the bottom effortlessly too.

Easy to transport – from the vehicle through the door

Weighing 275 kg, the stage remains light enough to protect delicate floors. With a transport width of 735 mm, you can wheel it through standard doors, and thanks to its EU pallet dimensions and low profile, you can load it into standard panel vans. For rough terrain or when using a ramp, you can make use of the forklift pockets and crane eyes.

Tested safety – with certification

The stage has been tested in accordance with DIN EN 280-1 (Class 1A); the CE Declaration of Conformity and test report are available in German. A 12-month warranty applies.
