

Safety. Made in Germany.

Safety and  
efficiency for  
your bus fleet

Customised access equipment

**One family.  
One name.  
One mission.**

**With our innovative 'Made in Germany' access equipment solutions, we are regarded as a guarantor of maximum safety. A promise that has always been kept over generations by the Munk family of entrepreneurs. Our family name and our MUNK brand are a guarantee for the continuity of our values and the future of the company in family hands. For maximum safety during your work. Designed and manufactured in Germany.**

Safety. Made in Germany. This has been the mission of the Munk family for more than 125 years. Whether for trade, industry, emergency and rescue services or the public sector – professionals put their trust in the quality of our products, services and solutions. Quite simply because they can rely absolutely on the uncompromising quality of our access equipment solutions in daily use.

On innovative products that are always one step ahead and therefore offer you decisive added value: maximum occupational safety Day after day. To protect the most valuable thing in life – your health. Guaranteed by the perfect interaction of optimum function and maximum reliability.

**The name MUNK Günzburger Steigtechnik** represents a clear commitment. To the tradition, values, and future security of our company, with its production site in Germany. Continuing in family hands. Today and in the future.

**MUNK. Safety. Made in Germany.**

Ferdinand Munk  
Owner and Managing Director of the MUNK Group

\* TÜV seal "Made in Germany": All products manufactured at our sites carry this symbol

Four business units. One promise.

## MUNK. Safety. Made in Germany.

Whether access equipment, rescue equipment, profile technology or service. The rising demand for safe, highly functional and innovative products, services and solutions from Germany continues unabated worldwide. Especially when users have to rely on the uncompromising functioning of access equipment products in the field or at the workplace.

MUNK Günzburger Steigtechnik therefore offers superior solutions in all product areas. From standard products to individual special constructions, always perfectly in line with the task at hand. With clever details that ensure maximum ergonomics, optimum functionality and the decisive added extra in work safety.

**MUNK Günzburger Steigtechnik**  
With over 2,500 smart and innovative products in the standard range as well as custom special constructions, we offer the perfect solution for every activity and task.

**MUNK Rettungstechnik**  
Whether for fire or rescue services or disaster relief. With our smart and innovative products, we offer the right equipment for every scenario and every emergency.

**MUNK Profile technology**  
With our modular profile system, diverse solutions can be configured individually and professionally, and assembled in a straightforward manner. For use in industry, in the trades, and by aid organisations.

**MUNK Service**  
The comprehensive service portfolio for your access and rescue equipment: from installation, maintenance, testing and repair, to our spare parts service and seminars.

## Customised access equipment

4 stars for  
your safety

Rely on us as your competent partner in the field of access equipment solutions. From analysis, design and construction to first-class after-sales service, we are the industry leader. Contact us today and experience the difference.

### Analysis

We set standards when it comes to evaluating access equipment requirements. Our experts take enough time to understand your specific needs precisely. After a thorough analysis, we present you with a customised design that is perfectly tailored to your individual circumstances. You can rely on us to recognise your challenges and develop innovative solutions.

### Concept

We are leaders in the design of special constructions. With creativity, technical expertise and a deep understanding of access equipment, we develop pioneering concepts. Our experienced team designs state-of-the-art solutions that meet the highest safety standards while maximising efficiency and ergonomics. You can rely on our outstanding solution expertise and be impressed by our innovative strength.

### Construction

We set the bar high in design. Our access equipment experts have unrivalled expertise and many years of experience in the field of access equipment. Using state-of-the-art technologies and high-quality materials, we realise your design down to the smallest detail. Precision and quality are our top priorities in order to offer you a special construction that meets the highest standards.

### After Sales

Our commitment does not end with the completion of the special construction. In after-sales service we are unbeatable. We are always available to carry out installation, maintenance, inspections and repairs to ensure that your special construction remains in perfect condition at all times. Our reliable team offers you first-class customer service and ensures that your satisfaction is paramount.

## Return on Prevention

Investing in occupational safety saves money and increases efficiency.

Access equipment solutions in the industry focus on **optimising processes and improving occupational safety**. In addition, every euro invested in **company prevention work** pays off with an average of € 2 in economic success potential. So if you want to be successful, you should **proactively invest in occupational safety** and benefit from the above-average prevention benefit-prevention cost ratio ( return on prevention)\*. This is precisely why you should become active in the current challenging times and utilise the opportunity for **sustainable Improvements and profitable investments**.

As a competent partner for safe working at height and at depth, we are at your side with a broad portfolio. If it doesn't fit "off the peg", we can supply you with a special construction. Working platforms, maintenance platforms, walkways or needs-based adaptations of our comprehensive series programme can be implemented **cost-effectively and individually as a customised solution** on request. Customised products in just a few simple steps. Find out more now!

## A plus in safety and efficiency for your bus fleet

In the bus industry, efficiency in production is just as important as safety during maintenance. MUNK Günzburger Steigtechnik offers customised special constructions that are optimised for both the production and maintenance of buses.

**Customised access equipment:** Our special constructions are manufactured exactly to your requirements. Whether mobile or rigid, with height adjustment or platform widening – we customise the designs to your specific production and maintenance processes.

**Maximum occupational safety:** Safety comes first. Our special constructions fulfil the strictest certifications and standards for occupational safety to ensure the safety of your employees during production and maintenance.

**Space-saving and compact:** We understand the challenges in the production environment and offer solutions that save space and still provide optimum working conditions. Integrated stairs or side-mounted Vario stairs ensure efficient utilisation of the available space.

**Flexibility:** With our double-sided or single-sided working platforms and variable lengths, we offer maximum flexibility for various production and maintenance scenarios. Thanks to easy manoeuvrability and parking brakes, our special constructions can be used at different work stations without any problems.

**Edge protection and zero gap:** Our platforms are equipped with edge protection that enables damage-free working on the buses. Another advantage is the reduction of the gap to almost zero to maximise the safety of employees.

**Time savings and cost efficiency:** Thanks to short set-up times and the ability to use the platform for different vehicle models, you save time and costs in production and maintenance.

**All-round service:** From development and assembly to the supply of spare parts, we offer a comprehensive service from a single source. You can rely on the experience and expertise of our access equipment experts.

**Gap dimension zero**  
for maximum protection of people and the vehicle.

**Mobile work platform**  
for flexible use and optional height adjustment

**Side protective cage**  
for securing the work area, optionally with lowerable skirting boards

**Working platform with side safety cage**  
Ref. no. 30329915

**Type of construction**  
▪ manually mobile

**Load**  
▪ over 300 kg

**Height**  
▪ fixed, rigid

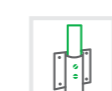

**Functions**  
▪ impact protection

**Customisation**  
▪ expandable workspace

▪ Access protection

**Railing design**  
▪ rigid

## Customised stairs, bridging and walkways

- Customised: made to measure with just a few clicks.
- User-friendly: Simple input, immediate result.
- Fast: From design to quotation in minutes.
- Flexible: Manage your configurations online from anywhere.
- 3D visualisation: instant view, precise planning.

## Customised fixed and shaft ladders

- Customised: Configurations for every requirement.
- Intuitive: Easy operation, direct visualisation.
- Attention to detail: customised work for optimum safety.
- Accessible: Can be used for any vertical ladder project.
- 3D visualisation: Interactive model view for precise planning.

## Your safety, our priority

With our configurators, you are opting for the highest standards in safety and security. Customisability. Our platform not only offers a wide range of customised solutions, but also sets new standards in user experience. Experience it for yourself!

## Your advantages

### Accurate fit at the touch of a button:

Experience customised precision with our user-friendly configurators. Design your access technology products exactly as you want them – available at any time, intuitive to use and quick to implement. From the initial input to the finished product, we deliver quality that impresses and reaches you quickly.

## Quality and safety

### Workmanship. Made in Germany:

Our configurators are more than just tools – they are your quick access to safety-tested and flexible access technology solutions. We produce in accordance with the strict DIN EN ISO standards and thus guarantee the highest safety standards. Clear instructions support you during assembly or installation. You commission our colleagues from MUNK Service, who will be happy to support you with the installation, maintenance and repair of your access technology equipment.

## Technology and innovation

### Pioneering technology:

In our online configurators you can create and customise 3D models of your products in real time. You can simulate wall contours for vertical ladders and define special requirements for stairs and bridging steps to master any challenge. The technology is complex, but the operation is not.
