xetto[®] transport and lift trolley

Innovative technology
combined with logistical
versatility

xetto® – the mobile all-rounder

Lifting heavy loads and equipment or using them to load and unload vehicles has never been so easy! Because where muscle power of several people, pallet trucks or forklifts were necessary in the past, the innovative xetto® makes everyday life in the tool shed easier with just one device!

The special feature: Thanks to the integrated micro-hydraulics, one person can load loads of up to 250 kg into a van with the xetto® all by themselves and without much effort by moving the unique lifting system above the height of the loading sill and pushing the platform into the vehicle. Safely placed there, the scissor system is simply retracted, locked under the load and extended again for unloading if required - it could hardly be more time-saving and ergonomic. In addition, the xetto® can also be used in the tool shed as a mobile workbench and lifting table.

Xetto is the smart professional device for:

- Loading and unloading
- Transport
- Ergonomic work on site (mobile workbench and lifting table)

Xetto is health-friendly, it contributes to improved occupational safety and leads to fewer absences from work, e.g. due to back injuries.

- Xetto enables employees to work more independently, supports and relieves them. They can do it easier and on their own!
- Xetto is mobile, which means that the payload of the vehicles can be used optimally and the disposition of the vehicles is more flexible.

Calculation example:
 1 person à EUR 46.90 / h (internal full cost rate)
 Unit price EUR 4,690 / EUR 46.90 = 100 hours
 100 hours / 50 weeks = 2 hours per week

With an average of one to two assignments per week, by 1 staff member instead of 2 staff members or more, the unit is fully amortised within the first year.

xetto® transport trolley

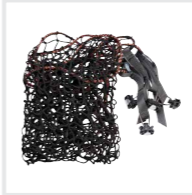

- Unique combination of trolley and lift table thanks to integrated micro-hydraulics and electronics
- Lifts loads up to 250 kg at the push of a button up to 106 cm ergonomically, cost-efficiently and saves time
- Makes it possible for one person to load and unload heavy objects onto and from vehicles
- Can also be used as a mobile, gradually adjustable workbench
- Optimum travel characteristics thanks to two castors swivelling 360°
- Load securing by airline rails on the sides
- Simple and intuitive operation

Fig.: Order no. 120080

Max. Working height mm	1.060
Max. loading sill height mm	800
Loading area mm	1.186 x 826
Lifting time s	20
Drive unit	Li-Ion battery 14,4 V / 6 Ah
Weight kg	95,0
Max. load capacity kg	250
Order no.	120080

Accessories

			
Additional battery Li-Ion 14,4 V / 6 Ah	Cord net For securing small parts on the platform Dim.: 1.000 x 1.400 mm	Tarpaulin To protect the load from moisture and dirt Dim.: 1.000 x 1.400 mm	Lashing strap without hook To securely fix the load on the xetto®
			
Lashing strap with hook To securely fix the load on the xetto®	Loading bridge For fast and ergonomic loading	Access ramp For easy loading of the xetto® with rolling goods	Support foot For a stable stand when used as a lifting table
