Self-tapping threaded insert

Specification

Weight/piece 5 g	Groove size 8 mm	Dimension A 12 mm	Dimension B 20 mm	Business division MUNK Profiltechnik
Order no. 930216				

Facts

- Self-tapping threaded insert, for permanent, wear-resistant connections
- Self-tapping for secure anchoring in soft materials such as aluminium
- Easy installation: no pre-drilling/tapping necessary.
- Optimised for fast and vibration-resistant assembly
- Durable and reliable, ideal for heavy-duty connections

Description

Permanent threaded connections without preparatory work! The self-tapping thread insert from MUNK Profiltechnik anchors itself independently in aluminium profiles and creates secure M6 threads for permanent fastenings.

Installation without pre-drilling or thread cutting

- Self-tapping installation: Special thread tips cut into soft materials on their own – simply screw in and you're done
- Secure anchoring: 20 mm screw-in depth for maximum holding force in the profile wall
- Optimised for 8 mm T-slots: Precisely fits all MUNK 40 mm and 80 mm profiles

We reserve the right to make technical changes and price changes.

Permanent fastening points

- Firm connections: M6 internal threads for permanent installations without dismantling cycles
- Vibration-resistant: Secure anchoring prevents loosening under dynamic loads
- Corrosion-protected: Galvanised steel for continuous use in industrial environments

Typical areas of application

- Machine frames: Permanent fastening points for permanently mounted components
- Automation technology: Permanent threads for housings and protective covers
- Enclosures: Fixed screw connections for maintenance flaps and covers
- Test benches: Stable threaded points for permanently installed superstructures

Discover the MUNK self-tapping thread insert – the time-saving solution for permanent threaded connections that can be installed quickly today and will last permanently tomorrow.
